## the right choice

### KE: THE RIGHT CHOICE

Gennius pergolas provide protection from sun, wind and rain all year long. Creating shade on demand helps keep you and your guests cool and comfortable on the hottest days and blocks harmful UV rays to help prevent sunburn and permanent damage to your skin.

Gennius pergolas combine the beauty of a classic structure with the flexibility of a moveable, waterproof roof, creating the warmth and comfort of an additional room to your home or business space.

Available in a wide range of sizes and styles, Gennius pergolas can cover a small deck, a large patio, or an expansive pavilion.

All KE components are manufactured in our own factory in Italy, under the highest quality standards. KE products are designed by experts and engineered for durability and service.

All KE products are built to your specifications at the time they are ordered. There is no inventory on hand - only one pergola made specifically for you.

KE is part of FederlegnoArredo, an organization that promotes the highest quality and excellence of Made in Italy products worldwide.

Installation of KE products is performed by authorized retailers and factory trained installers.

KE has been awarded patents and earned awards for design innovations and product performance.

Certifications include:  
 ISO 9001:2015  
 ISO 45001: 2018  
 ISO 14001: 2015  
 UNI EN 1090:2014  
 UNI EN 13561:2015

# Isola 3

KE

Gennius Pergolas 7

Isola 3 provides elegant design and minimalist styling that blends beautifully with any kind of architecture. Stainless steel hardware is hidden from view to create a seamless appearance.

The low arch shape of the Isola roof allows water to run into perimeter gutters and travel through internal channels to the ground, keeping occupants completely dry.

Integrated, dimmable LED lighting allows you to determine the light level you want so you can get the most from your outdoor space, day or night.

Thanks to modular design, Isola 3 can be installed side-by-side to create an infinite amount of covered space. From one unit to many, with a minimum number of posts, there is no limit to the size of the footprint you are able to create.

Sliding glass doors are available to create an enclosed space that blocks wind and cold, creating a year-round outdoor room.

Motorized screens can be integrated into the structure and hidden from view. Screen fabrics are available with a wide variety of colors and openness to create the exact kind of space you want.

Wind, rain and temperature sensors are available to create a system that is easily controlled remotely or automatically as desired. Fully compatible with home automation systems.

ISOLA 3

Isola 3 is available as a free-standing structure or can be mounted to a fixed wall. The gently arched roof folds back to reveal open sky when desired and closes to a watertight seal when closed. Screen or glass side enclosures are available.

Shade on demand, open sky when desired and waterproof as needed.	Isola 3 is designed to withstand strong wind (up to 9 on the Beaufort Scale).	Maximum width of a single unit: 18'	Maximum projection of a single unit: 32' 10"	EN 1090:2014 EN 13561:2015
			OPTIONS	
Dimmable LED lighting	Motorized, zippered screens	Sliding glass enclosure		

The essential design and elegant use of lights are distinctive features of Isola 3. Internal and external LED lighting is perfectly integrated within the profiles and becomes a design statement. Isola 3 makes outdoor spaces more enjoyable, multiplying your living space. Perfectly suited for homes, restaurants, hotels and hospitality venues.

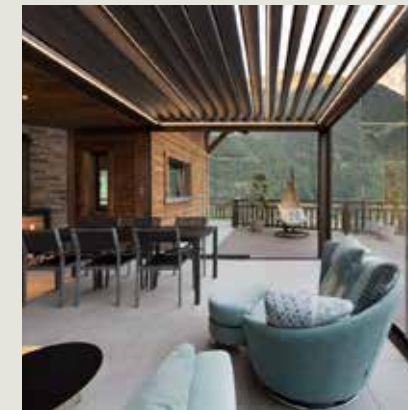

# Kedry Prime

KE

Gennius Pergolas 15

Kedry Prime provides elegant design and minimalist styling that blends beautifully with any kind of architecture. Stainless steel hardware is hidden from view to create a seamless appearance.

Rotating louvers open at the touch of a button to allow just the right amount of sunshine and air to pass through. And when it rains, they close to a watertight seal, directing water to run into perimeter gutters and travel through internal channels to the ground, keeping occupants dry in any weather.

Integrated, dimmable LED lighting allows you to determine the light level you want so you can get the most from your outdoor space, day or night.

Modular design allows Kedry Prime to be installed side-by-side to create an infinite amount of covered space. From one unit to many, with a minimum number of posts, there is no limit to the footprint that can be created.

Sliding glass doors are available to create an enclosed space that blocks wind and cold, creating a year-round outdoor room.

Motorized screens can be integrated into the structure and hidden from view. Screen fabrics are available in a wide range of colors and openness to create the exact kind of space you want.

Wind, rain and temperature sensors are available to create a system that is easily controlled remotely or automatically as desired. Fully compatible with home automation systems.

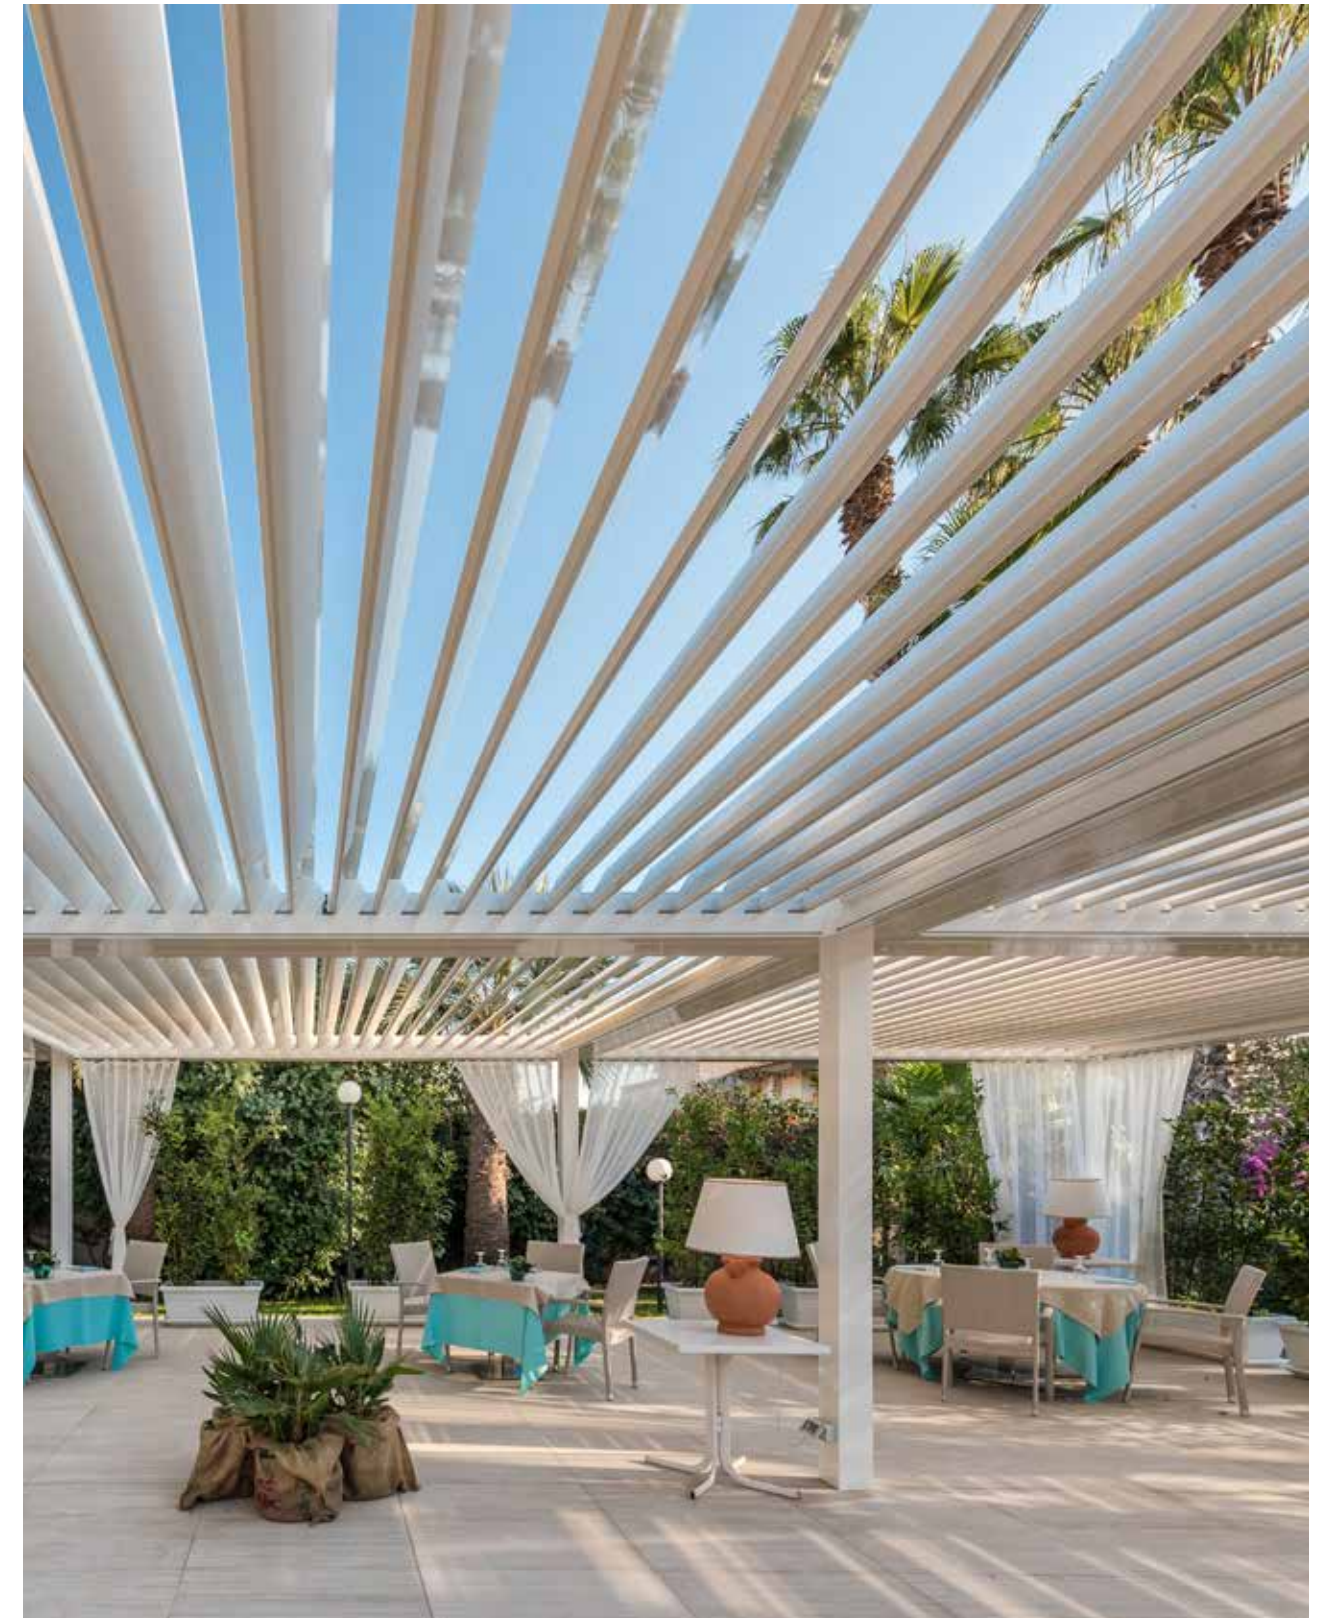

KEDRY PRIME

Kedry Prime is available as a free-standing structure or can be mounted to a fixed wall. Aluminum louvers rotate open to reveal sun and sky when desired and close to a watertight seal when needed. Screen or glass side enclosures are available.

Shade on demand when desired and waterproof as needed.	Kedry Prime is designed to withstand strong wind (up to 9 on the Beaufort Scale).	Maximum width of a single unit: 16'5"	Maximum projection of a single unit: 23'2"	EN 1090:2014 EN 13561:2015
Dimmable LED lighting	Motorized, zippered screens	Sliding glass enclosure

Kedry Prime makes outdoor spaces more enjoyable, multiplying your living space. Perfectly suited for homes, restaurants, hotels and hospitality venues.

# Kedry Skylife

KE

Gennius Pergolas 23

Skylife provides the best combination of louvers and a fully retractable roof. This allows for unrestricted view of open sky when retracted, and a watertight seal when closed.

Skylife can be installed side-by-side to create an unlimited amount of covered space and is perfect for commercial or hospitality venues of all sizes.

Integrated, dimmable LED lighting allows you to determine the light level you want so you can get the most from your outdoor space, day or night.

There is no limit to what you can achieve with Skylife. Create an outdoor space to be used any time all year long for entertainment, relaxation and dining with family, friends, customers or just for you.

Sliding glass doors are available to create an enclosed space that blocks wind and cold, creating a year-round outdoor room.

Motorized screens can be integrated into the structure and hidden from view. Screen fabrics are available with a wide variety of colors and openness to create the exact kind of space you want.

Wind, rain and temperature sensors are available to create a system that is easily controlled remotely or automatically as desired. Fully compatible with home automation systems.

KEDRY SKYLIFE

Skylife is available as a free-standing structure or can be mounted to a fixed wall.

---

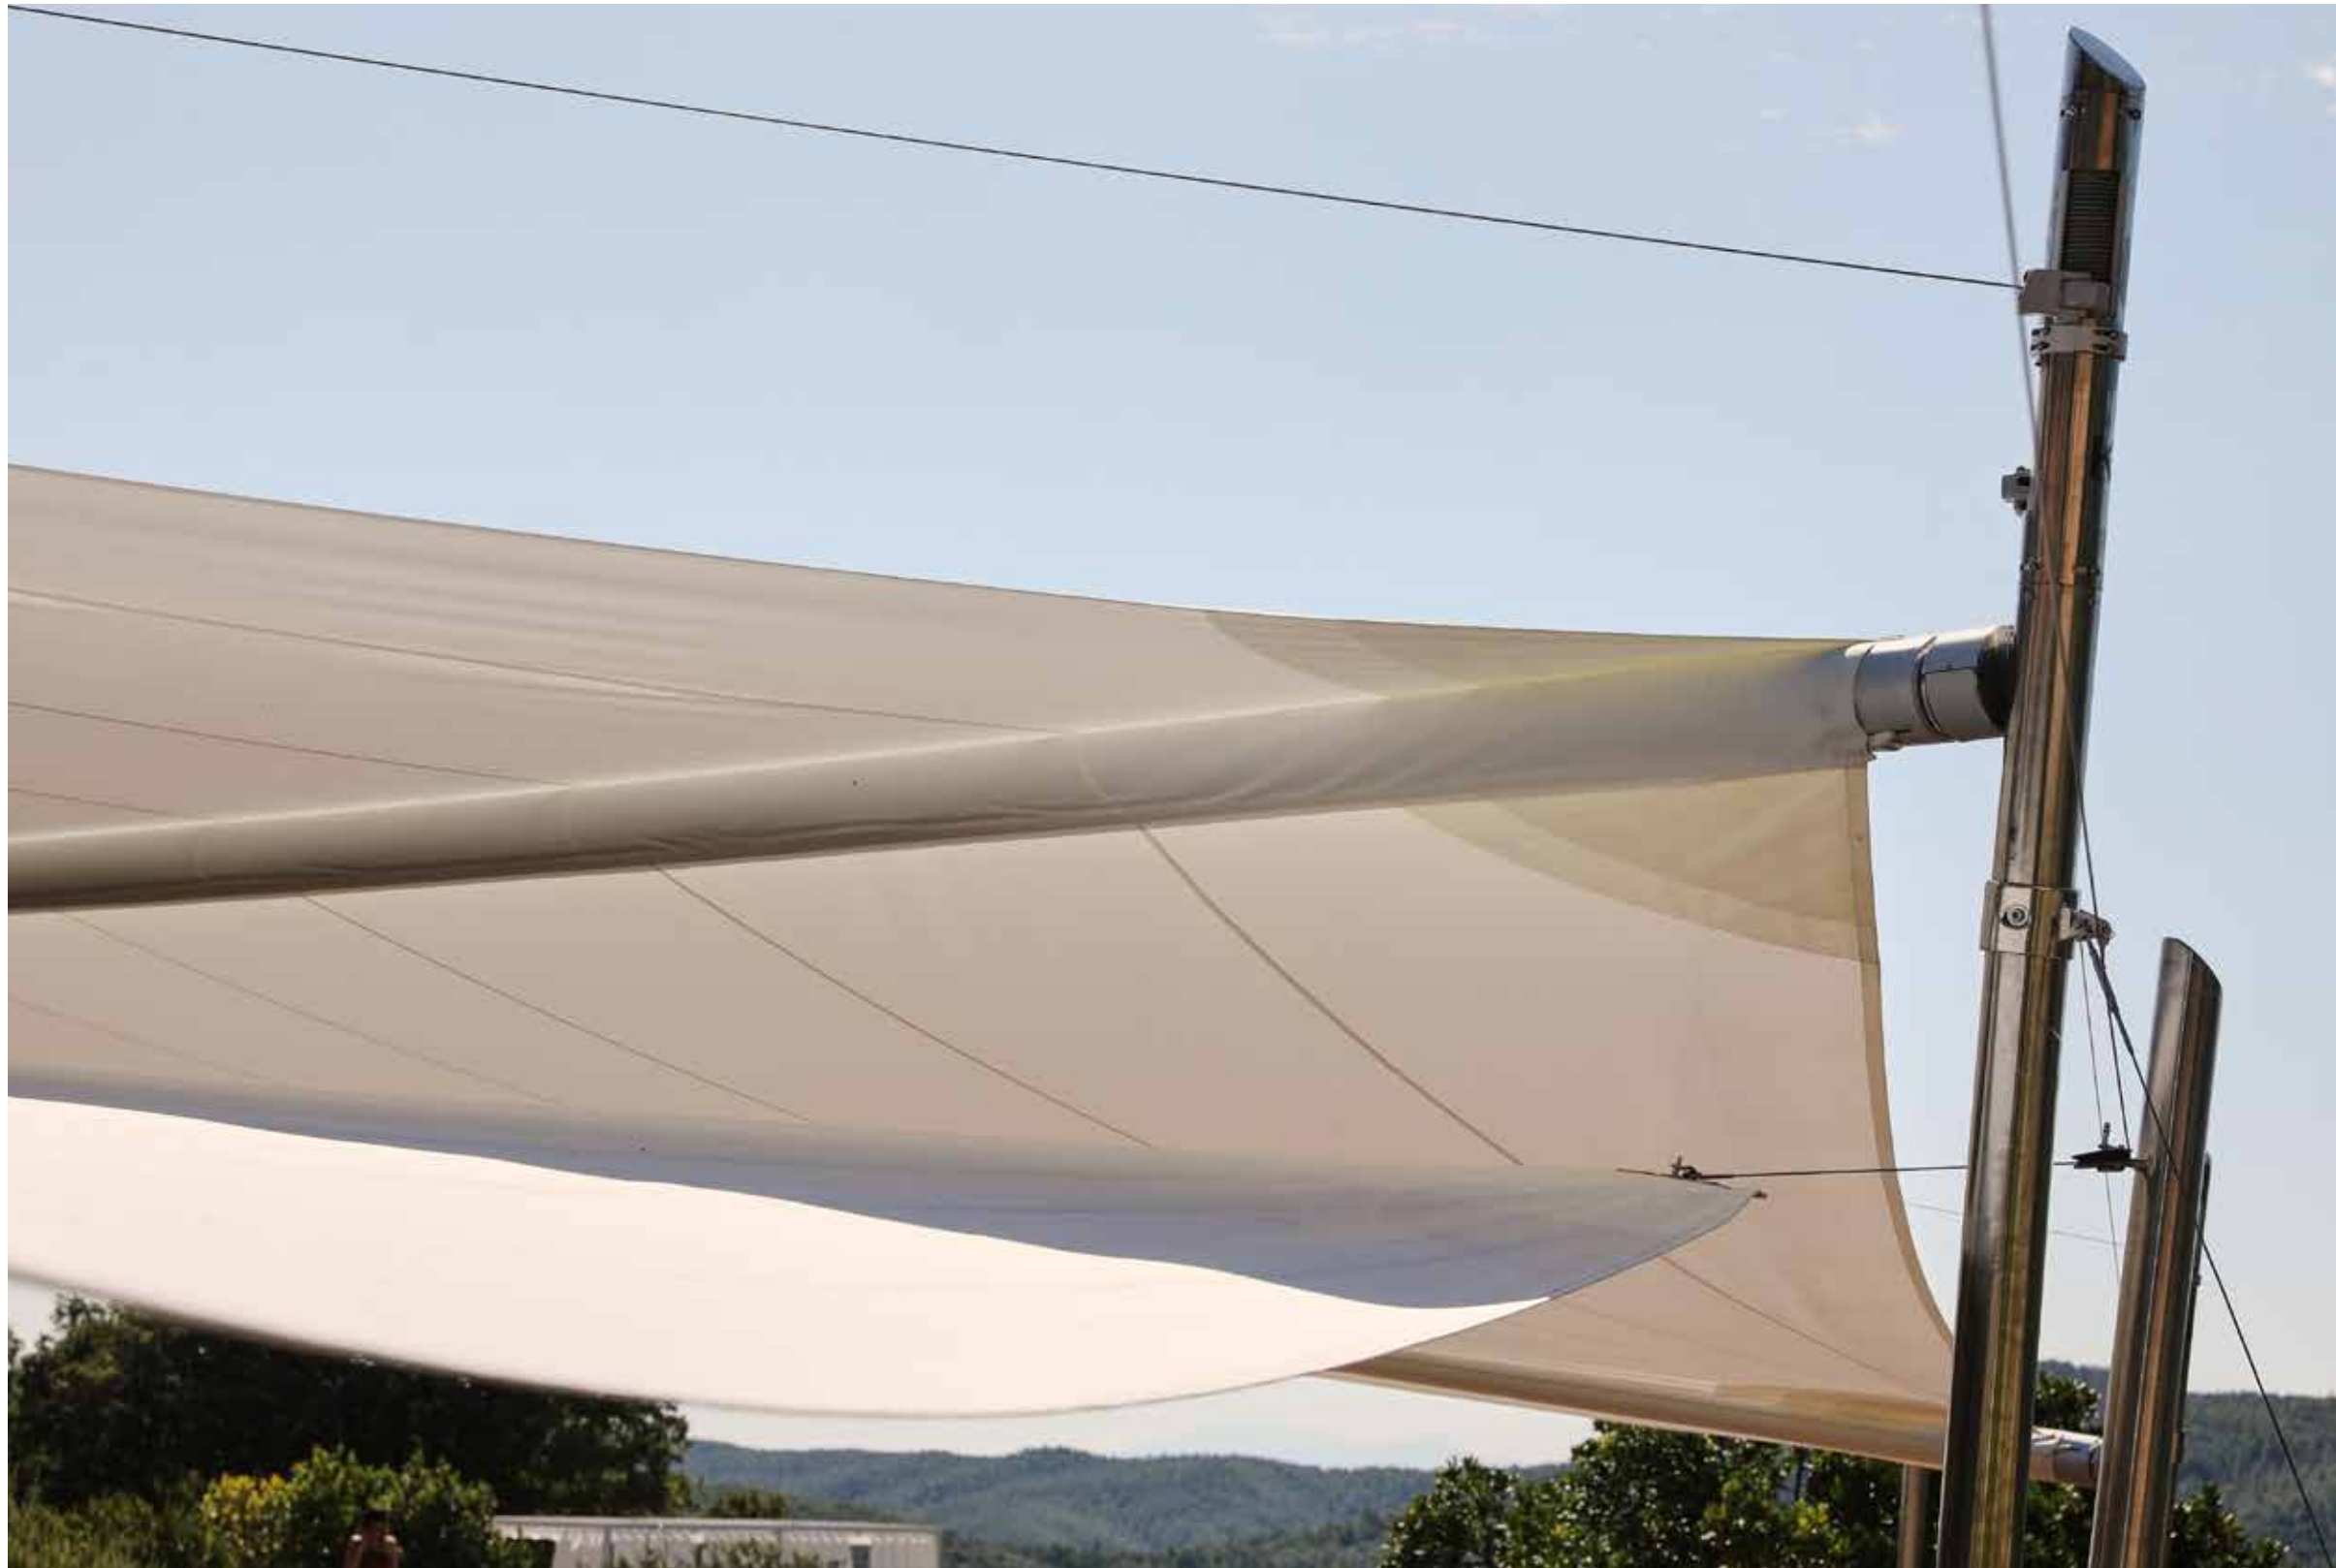

**KHEOPE**

---

Kheope is a fixed-column sail shading system able to cover a very large area. With its stainless steel frame and nautical quality fabric, Kheope is a motorized retractable sail shade system that smoothly rolls out when needed and then rolls back up out of the way.

Maximum width is 30'

**KOLIBRIE**

Gennius Pergolas

Kolibrie is a self-standing sail shading system featuring stainless steel construction and a column that rotates 360° on smooth pedestal bearings. Available in either manual or motorized, Kolibrie can close automatically in high winds with the optional wind sensor system. The fabric is Dacron polyester and is extremely durable and resistant to water, making it an ideal solution for hotels and resorts or anywhere a beautiful shade solution is required.

Maximum width is 12'6"

## SCREENS

Screens are the most popular choice for enclosing a pergola. They offer protection from bright sunshine, late day glare and flying insects. Screens also provide privacy and complete the look and feel of your new outdoor living space.

Screen fabrics are available in a wide variety of colors and degrees of openness to allow just the right amount of light and air to move through.
